

Back Bay Veterinary Clinic Vaccination Policy

All dogs admitted to our facility must be up-to-date on the following vaccines and examinations:

- Rabies
- Distemper (DA2PPCV or DA2PP-4L)
- Bordetella (Kennel Cough)
- Negative Annual Fecal test for internal parasites
- Negative Annual Heartworm Test.

We strongly recommend the use of year round flea and tick prevention for our canine patients.

All cats admitted to our facility must be up-to-date on the following vaccines and examinations:

- Rabies
- Distemper (FVRCP)
- Negative Annual Fecal test for internal parasites
- Negative test result for Feline Leukemia and FIV

We strongly recommend the use of year round flea and tick prevention for our feline patients.

If your pet is not currently up-to-date on any of the above tests or examinations, it is our policy and in your pet's best interest to perform them at the time of your visit. Thank you.
